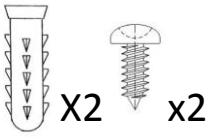
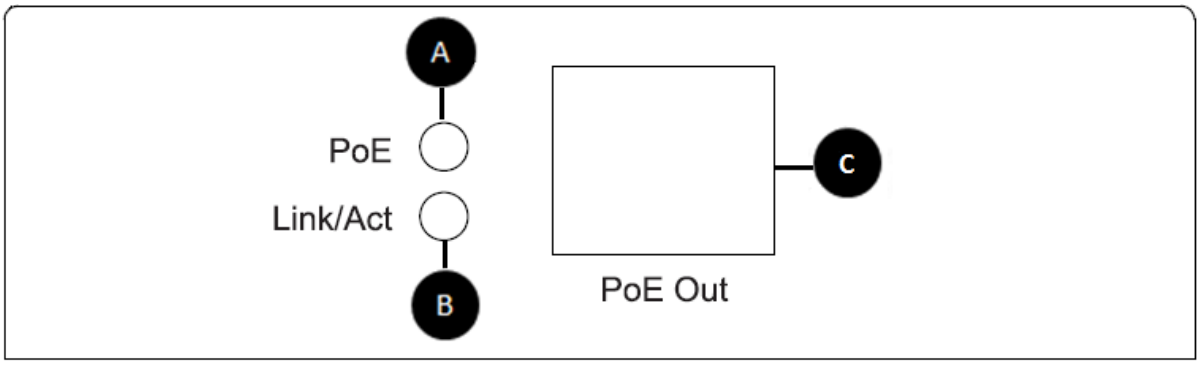
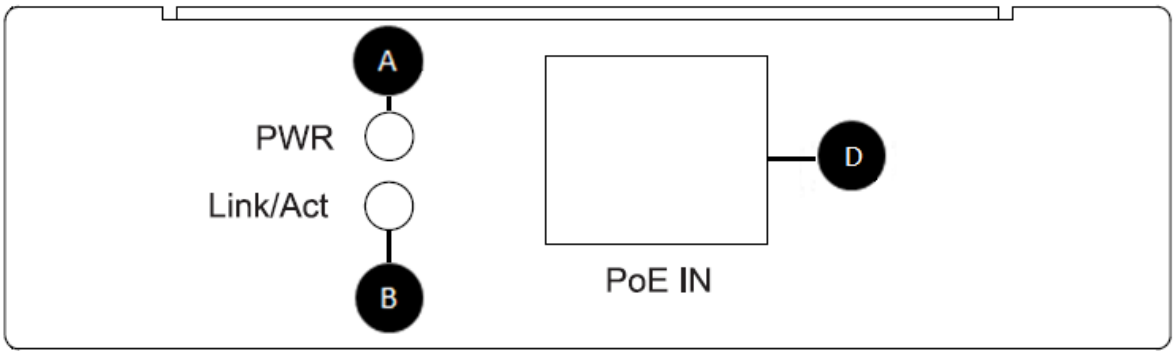
GP-101ET PoE Extender

QIG



I-2. Hardware Overview



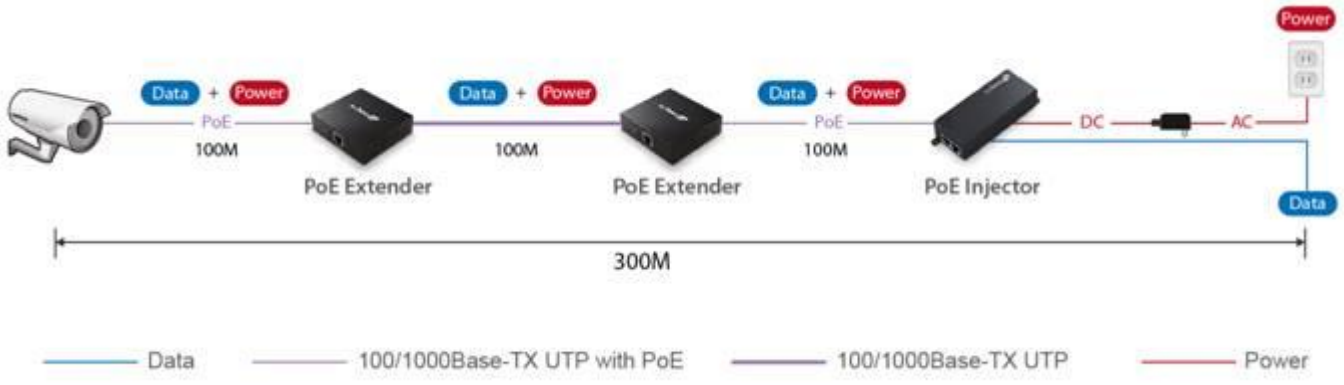


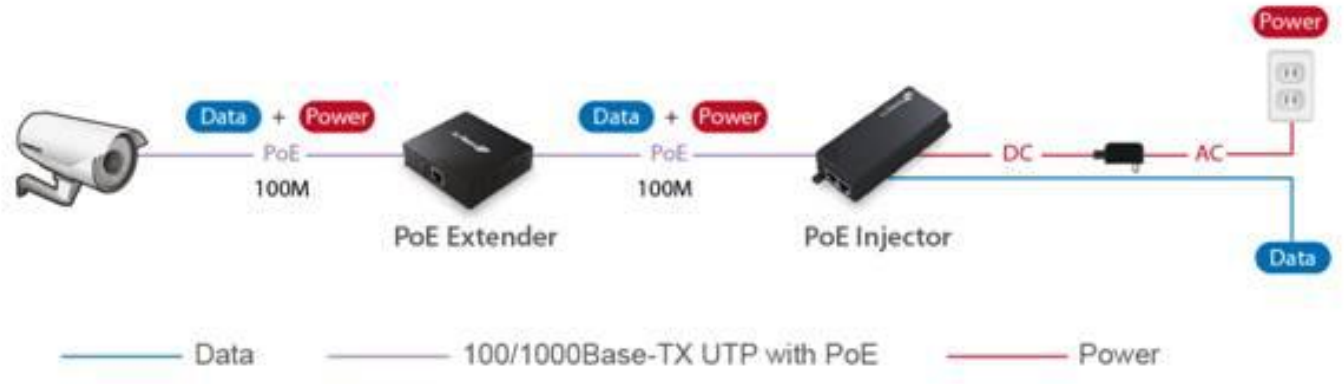
I-3. LED Status

Code	Name	Indication / Function
A	POWER LED	Off: power off or fail On: power on
B	Link/Act	Off: port disconnected or link fail On: 10/100/1000M connected Blinking: sending or receiving data.
C	PoE OUT	Off: PoE power output off On: PoE power output on
D	PoE IN	Off: PoE power output off On: PoE power input on

I-4. Connections

Connect the Extender as shown below:





The GP-101ET is installed between the PSE (Power Source Equipment) and the PD (Powered Device); it is powered by PSE and forwards the Ethernet data and remaining PoE power to the PD. The GP-101ET doesn't require an external power supply and it can be installed easily just plug and play; The GP-101ET injects power to the PDs without affecting the data transmission performance. It offers a cost effective and quick solution to extend power and data an additional 100m.

Connect GP-101ET to the Power Source Equipment (PSE)

Step 1: Connect a standard Cat.5/5e/6 UTP cable from Power Source Equipment (PSE), such as PoE Switch, PoE Injector hub and single port PoE injector, to the "IN" port of GP-101ET.

Step 2: The PSE delivers both Ethernet Data and PoE power over UTP cable to the GP-101ET and the "PoE IN" LED will be steady on.

Connect Gp-101ET to the Powered Device (PD)

Setp 1: Connect the additional Cat.5/5e/6 cable that will be used to connect to the remote Powered Device (PD) to the "OUT" port of GP-101ET.

Setp 2: The "OUT" port is also the power injectors which transmit DC Voltage to the Cat.5/5e/6 cable and transfer data and power simultaneously between the PSE and PD.

Setp 3: Once GP-101ET detects the existence of an IEEE 802.3at / 802.3af device, the "PoE OUT" LED indicator will be steady, ON to shows it is providing power.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio technician for help.

FCC Caution

This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the authority to operate equipment.

Federal Communications Commission (FCC) Radiation Exposure Statement

This equipment complies with FCC radiation exposure set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 2.5cm (1 inch) during normal operation.

Federal Communications Commission (FCC) RF Exposure Requirements

SAR compliance has been established in the laptop computer(s) configurations with PCMCIA slot on the side near the center, as tested in the application for certification, and can be used in laptop computer(s) with substantially similar physical dimensions, construction, and electrical and RF characteristics. Use in other devices such as PDAs or lap pads is not authorized. This transmitter is restricted for use with the specific antenna tested in the application for certification. The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

R&TTE Compliance Statement

This equipment complies with all the requirements of DIRECTIVE 1999/5/EC OF THE EUROPEAN PARLIAMENT AND THE COUNCIL of March 9, 1999 on radio equipment and telecommunication terminal equipment and the mutual recognition of their conformity (R&TTE). The R&TTE Directive repeals and replaces in the directive 98/13/EEC (Telecommunications Terminal Equipment and Satellite Earth Station Equipment) As of April 8, 2000.

Safety

This equipment is designed with the utmost care for the safety of those who install and use it. However, special attention must be paid to the dangers of electric shock and static electricity when working with electrical equipment. All guidelines of this and of the computer manufacture must therefore be allowed at all times to ensure the safe use of the equipment.

EU Countries Intended for Use

The ETSI version of this device is intended for home and office use in Austria, Belgium, Bulgaria, Cyprus, Czech, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Turkey, and United Kingdom. The ETSI version of this device is also authorized for use in EFTA member states: Iceland, Liechtenstein, Norway, and Switzerland.
